Description This quiz will be available until 1 hour before class on Apr 26. You have 1 try and will get 10 minutes. After ten minutes the quiz will self submit. As a reminder, you can use all material, but communicating the questions or answers to fellow students is considered cheating. The quiz should be easy if you watched the videos and read the material.

### ☐ 1. Multiple Choice: Multiple Choice: Method dispatch tak...

Points: 34

#### Question

Multiple Choice:

Method dispatch takes place based on ...

#### Answer

the size of the object given as argument

☒ the class of the object given as argument

the position of the object given as argument

where in the code the object is generated

### ☐ 2. Multiple Choice: Consider the following function defin...

Points: 33

#### Question

Consider the following function definition:

```
foo <- function() print('Hello')
```

How can we change this function definition to make the function invisible?

**Answer**

```
(foo <- function() print('Hello'))
```

```
<>foo <- function() print('Hello')
```

```
!foo <- function() print('Hello')
```

```
?foo <- function() print('Hello')
```

☒ `.foo <- function() print('Hello')`

☐ **3. Either/Or: The '...' is a way to define a functi...**

Points: **33**

**Question**

The '...' is a way to define a function without specifying all potential parameter names up front.

**Answer**

☒ Agree

☐ Disagree
